Electronic Health Record Sharing System

Upon successful registration with the Electronic Health Record Sharing System (eHRSS), you can give sharing consent¹ to individual participating healthcare providers (HCPs)², allowing their healthcare professionals to share and access your electronic health records (eHRs) of the following 9 types within the sharable scope for providing more suitable healthcare services to you.

Scope of eHR Sharable Data

The progress of uploading eHR sharable data by individual HCPs may vary subject to their level of computerisation and data standardisation of medical records. For details of data types shared by individual HCPs, please approach the HCP concerned or visit the eHRSS website.

¹ Except the Hospital Authority (HA) and the Department of Health (DH). After joining eHRSS, you are taken to have given sharing consent to HA and DH

² Refer to eHRSS participating healthcare providing organisations in the public and private sectors (e.g. hospitals, clinics, social welfare organisations, elderly homes etc.)
