Features

One-stop Solution

System supports the daily administration and operation of private solo or group practice healthcare providers. Apart from essential functions such as patient registration and appointment, clinical documentation, prescriptions and dispensary, billing etc., special features related to consultations such as standardized terminologies, acupuncture and bone-setting by CM practitioners are included.

eHealth Connectivity

System complies with the security and system interoperability requirements for data sharing in eHealth, which paves way for the connection with the eHealth for sharing of clinical data.

Clinical Decision Support

System provides clinical decision support features such as herb-herb interaction, pregnancy alert, high dosage alert and G6PD deficiency alert in enhancing quality of care and safety.

Application of EC Connect Adoption

Contact EC Connect Project Team

ec-connect@ehealth.gov.hk

- E-signing of licence
- eHealth registration

1

System Installation and Training

- Installation service and training provided by service provider
- Preparation of drug profile

2

Live Run

- Final setting performed by service provider
- Import of drug profile

3

Clinic Adaptation and Trial Period
