

Know more about eHealth!

Connect with eHealth to enhance clinical efficiency!

Benefits

Healthcare Providers (HCPs)

- Access patients' health records instantly with authorisation, enhancing clinical efficiency and service quality.
- Facilitate participation in Public-Private Partnership programmes and deposit of relevant medical records into eHealth, fostering cross-sectoral and multi-disciplinary healthcare collaboration.

Patients

- Build lifelong and comprehensive electronic health records (eHRs) to support management of personal health and healthcare services.
- Enable formulation of personalised treatment plans by HCPs, enabling more accurate diagnoses and reduce care costs.

eHealth+ Connectivity Support Scheme

to support private HCPs to connect with eHealth!

- Launch the eHealth+ Connectivity Support Scheme, to empower private HCPs in adopting electronic medical record systems (EMRS) that are connected to eHealth for depositing eHRs of patients with authorisation.

Additional ways of connecting to eHealth

eHealth+ Connectivity Accreditation Scheme Empowering citizens to take control of their personal health records!

- Recognises HCPs that have met technical standards to deposit eHRs into citizens' personal eHealth accounts.

Gold mark – capable of depositing all essential eHRs (including allergy and adverse drug reaction, encounters/ appointments, medications, immunisation, laboratory and radiology reports) and more

Silver mark – capable of depositing all essential eHRs

Bronze mark – capable of depositing one or more types of eHRs

Special marks for medical laboratory centres and radiology diagnostic centres – capable of depositing laboratory and radiology records

- Citizens can easily choose suitable HCPs by their accreditation marks and ensure their medical records are deposited in their personal eHealth accounts.
- Use the "Doctor Search" function on the eHealth App or website to check the accreditation status and eHRs deposit capabilities of individual HCPs
