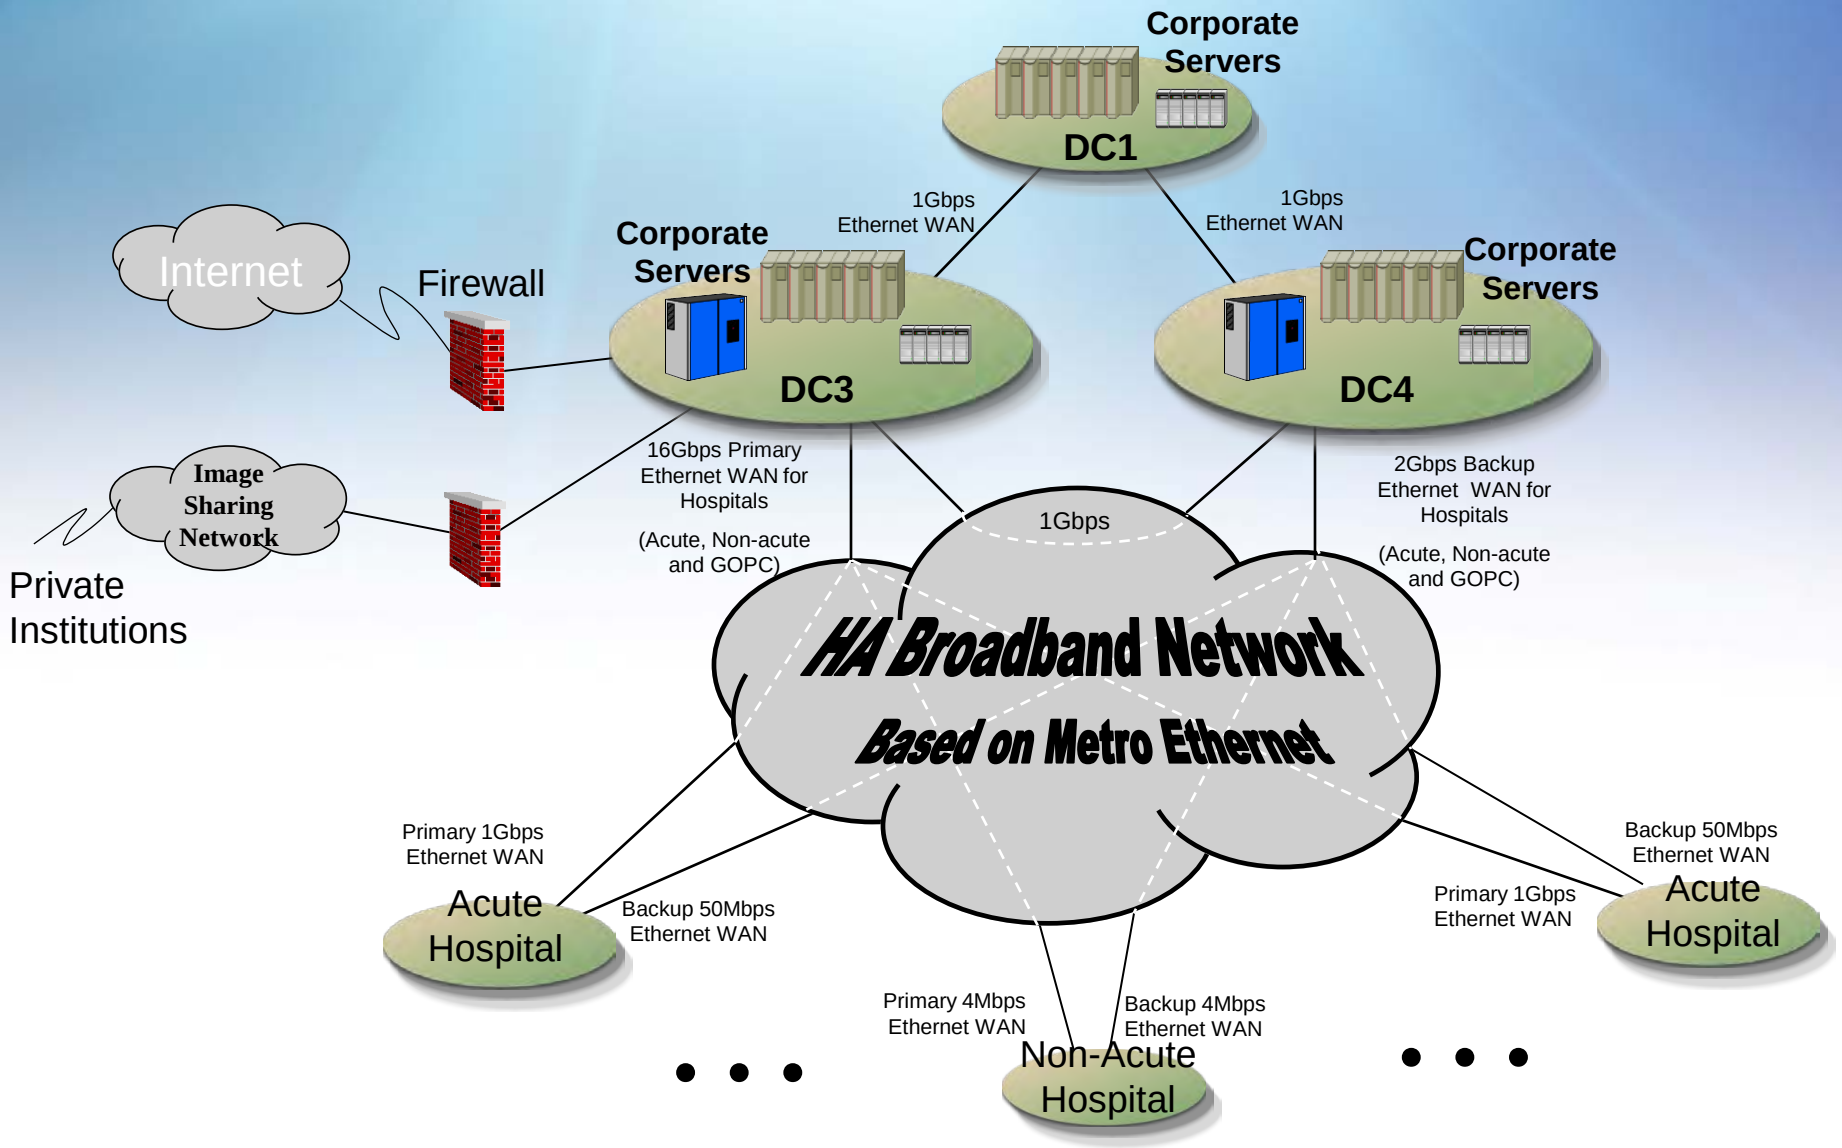
eHealth Presentation
Network Service

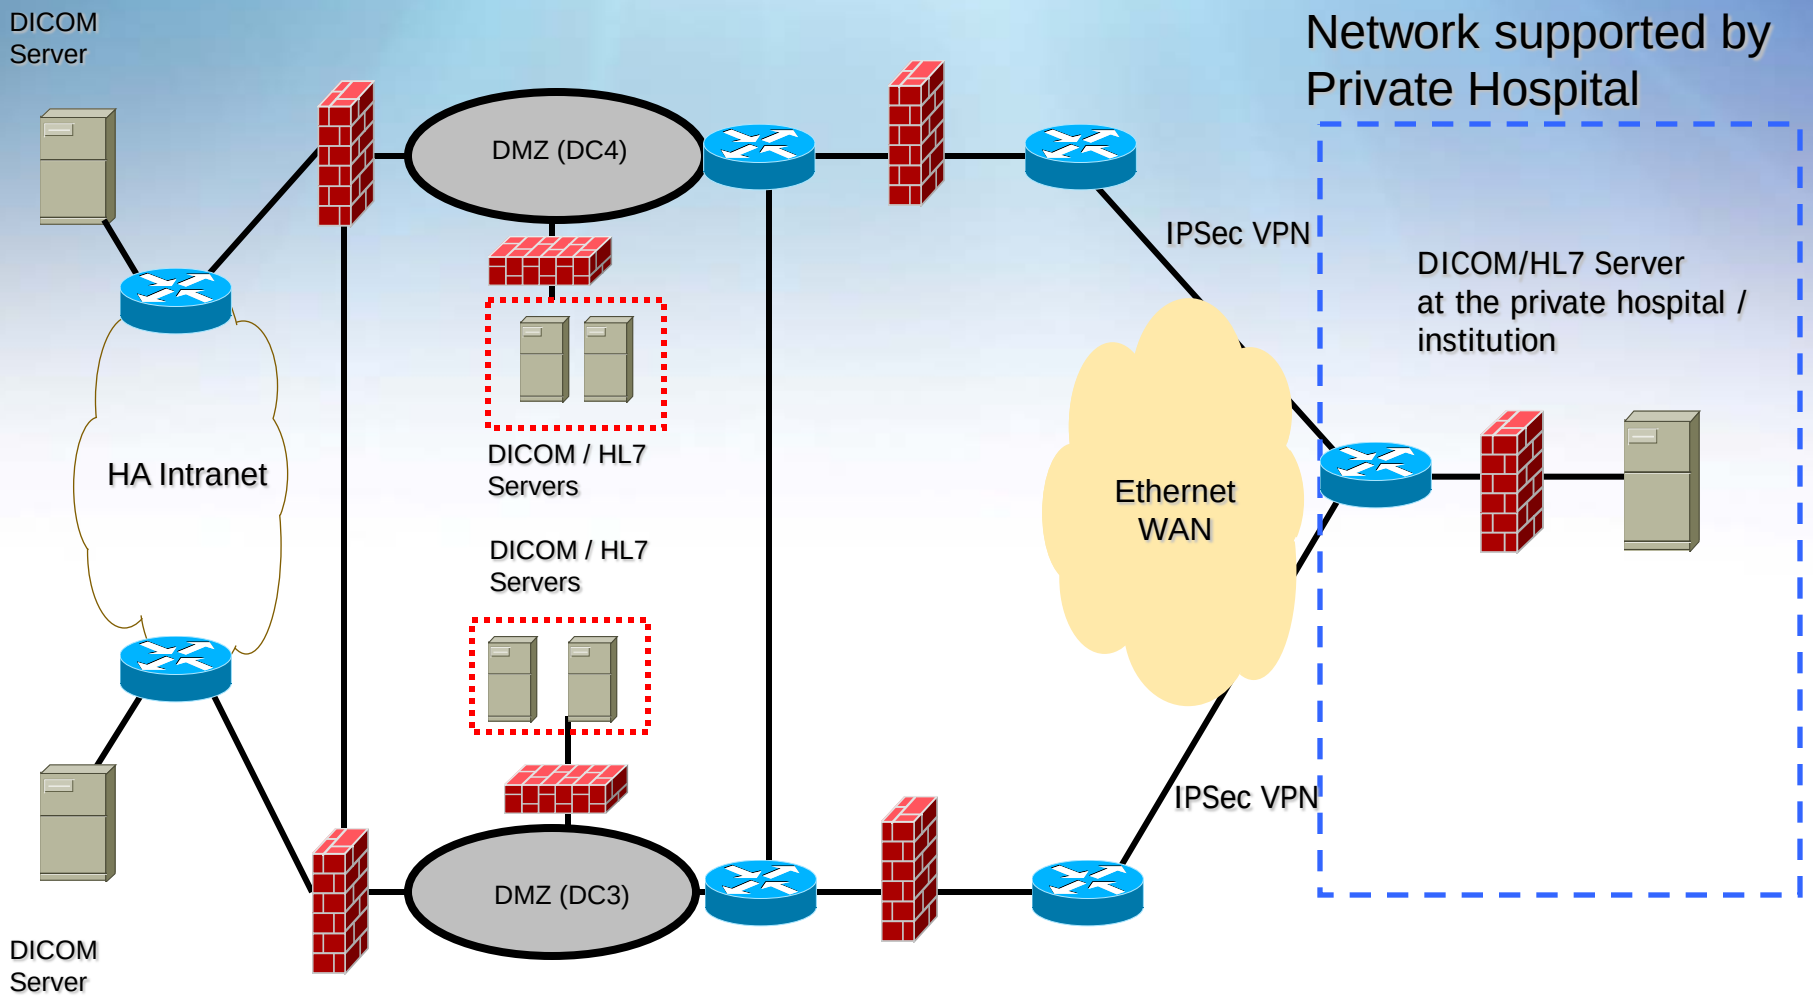
by Raymond Cheung

1st and 20th of September, 2010

HA Wide Area Network



Network Connection for Image Sharing



Security Considerations

1. Enable IPsec site-to-site VPN
2. Install E-Cert for server-to-server authentication
3. Use HTTPS protocol instead of HTTP
4. Install Anti-Virus (AV) Software program on concerned servers and keep the Virus definition up-to-date
5. Install system patches on concerned server regularly
6. Ensure servers are properly hardened according to industry best practice
7. Consider dual links / data centers for business continuity

THE END
