

# Accessing patient's eHR from local system

Preparation for eHR

28 June 2013

Dr Summer Chan

# Prerequisites

- Healthcare provider (HCP) enrolment to eHR
- Patients' enrolment
- HCP local system enhancement
  - Connection to eHR sharing system (eHRSS)
  - Capture patient's eHR status
    - eHR number
    - Relationship with HCP
  - Way to open eHR viewer, e.g. new button

# Gathering patient's clinical information

**History taking**

Relevant  
records in ePR

***eHR***

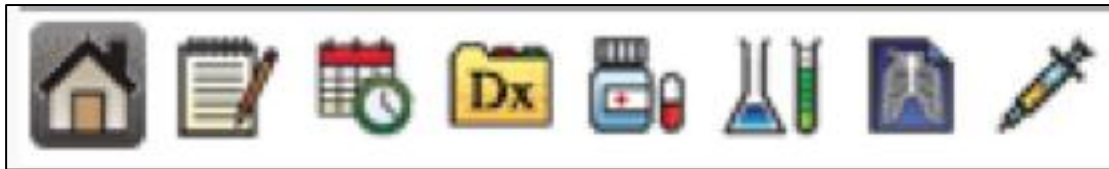

**Medical  
records**

Handheld Private  
reports from patient  
(if any)

## eHR viewer screen shots

# Enhancing record access experience

1. Function icons in eHR viewer for different domains

2. Only available record domains be shown in “eHR content tree”
3. Similar user interface design with PPI-ePR yet Noticeable difference in colour theme

# Clinical note & summary

The screenshot displays a clinical information system interface. At the top, there are tabs for 'Clinical', 'Administration', and 'Information'. The 'Clinical' tab is active. Below the tabs, patient information is shown: '李敏敏 LEE, MAN MAN', 'HKIC : Q001003(7)', 'DOB : Aug-1953', 'Age : 59 years', 'Sex : F'. There are buttons for 'Allergy & ADR', 'Close Record', and 'Select Patient'. The main content area is titled 'eHR Document Viewer' and shows a 'Clinical Note & Summary' for 'Alice Ho Miu Ling Nethersole Hospital'. The note includes sections for 'Discharge Summary', 'Discharge Information', 'Drug Allergy', 'Alert', 'Patient Information', 'Patient Condition at discharge', and 'Summary of nursing care plan'. A sidebar on the left contains a 'Record index' with a list of records, including 'Discharge Summary' and 'Other record'. A blue arrow points from the 'Record index' to the 'Patient Condition at discharge' section.

# Investigation Report

The screenshot displays the eHR Document Viewer interface. At the top, there are tabs for Clinical, Administration, and Information. The patient information bar shows: 李敏敏 LEE, MAN MAN, HKIC: Q001003(7), DOB: Aug-1953, Age: 59 years, Sex: F. There are buttons for Allergy & ADR, Close Record, and Select Patient. The left sidebar contains a menu with categories: Clinical Note & Summary, Encounter, Problem & Procedure (highlighted with a red circle), Medication, Laboratory Record, and Radiology Record. The main area is titled 'eHR Document Viewer' and shows 'Page 1 of 1' with a search bar and zoom controls. The text 'PDF Report Version 1' is overlaid on the document area.

Clinical History recurrent haematuria, KUB no stone, occ right loin pain Clinical Diagnosis hematuria INTRAVENOUS UROGRAM (PROTOCOL DRIVEN) FINDINGS: The preliminary KUB film shows roundish multiple tiny (~ few mm) opacities projected over the pelvis (R>L), likely representing phleboliths. No other abnormal opacity seen along both urinary tract. Prompt bilateral nephrogram and satisfactory renal excretion. The size of both kidneys are within normal limits. They are in normal position and axis. The renal contour and parenchymal thickness are normal on both sides. Left and right renal pelvis are not enlarged and bilateral renal calices remain normal in shape. Satisfactory drainage without hold up of contrast. Bilateral ureters are smooth without hold up of contrast. The urinary bladder shows smooth contour. There is no gross intravesical filling defect. Conclusion: No obvious urinary tract abnormality or stone.
