Text Report

History:

Admitted for chest infection. Incidentally found to have RUL opacity, LZ rounded opacity. Right shoulder pain.

Chest X-ray (AP sitting, apico-lordotic and lateral views):

There is a 1.6 cm rounded opacity noted over left lower zone, showing no significant interval change since March 2001. A slow growing neoplasm has to be excluded. Further CT assessment suggested.

X-ray Left Shoulder (AP & lateral views):

Mild irregularities are noted over the greater tuberosity of the left proximal humerus, suggestive of degenerative change. No other bony lesion is seen. Joint spaces and articular alignment appear unremarkable. The LLZ opacity noted on the chest film is also visible.

檢驗報告 Examination Report

Case No.:

HKID:

Name: Testing Patient A

Sex: F

Age: 96y

DOB: 1916

Hosp / Spec / Ward: QMH / MED /

Imaging No.: A1234563

Exam Date: 07/03/2012 21:10

 Examinations: MR-BRAIN (PLAIN-CONTRAST)
Report:

Clinical History

NPC T3N3b disease completed chemoRT in 12/2010. Recent progressive increased EBV DNA while MRI NP and neck and PET/CT are inconclusive. For surveillance MRI NP and neck. Please kindly compare with last MRI in 02/12.

Clinical Diagnosis

NPC

檢驗報告 Examination Report

Case No.:

HKID:

Name: Testing Patient A

Sex: F

Age: 96y

DOB: 1916

Hosp / Spec / Ward: QMH / MED /

Imaging No.: A1234563

Exam Date : 07/03/2012 21:10

Examinations: MR-BRAIN (PLAIN-CONTRAST)
Report:

Clinical History

NPC T3N3b disease completed chemoRT in 12/2010. Recent progressive increased EBV DNA while MRI NP and neck and PET/CT are inconclusive. For surveillance MRI NP and neck. Please kindly compare with last MRI in 02/12.
